Hydrocarbon dry cleaning machine

Name	unit	Model	
		JFH-10 (Built-in drying)	JH-10 (Without drying)
Installation power	Kw	4	0.2
Washing power	Kw	70	70
Drying power	Kw	3.7	/
Voltage	V/p/hz	220v/1p/50hz or 380v/3p/50hz	
Extraction speed	rpm	1200	1200
Cooling water pressure	mpa	1.5-2.5	/
Cooling water drain pipe	G	1/2	/
Size	mm	700*1100*1520	700*1100*1520
Weight	kg	320	230

Advantage

- 1.Multilayer filtration
- 2.Save space,just need 1square meter
- 3.Wash and drying are two in one and one-button start-up has high efficiency.
- 4.Suspended structure, without fixing, can be used by connecting water and electricity directly.
- 5.The washing effect of 1pcs clothes is the best, and clothes can be taken out in 40 minutes.
- 6.The automatic program can be controlled manually, and clothes can be added or reduced during washing.
- 7.User can choose to manually hydrocarbon solvents filtering during drying.
- 8.Many sets of washing programs make it easier to use and dry clean.
- 9."One-button" liquid filling "and" liquid discharging "are easier for users to use.
- 10.It is equipped with independent spin and drying functions to meet the washing needs of different clothes.
- 11.Efficient drying refrigeration recovery system, high recovery rate
- 12.Multiple accurate temperature controls make it safer to use.
